Mining and Minerals Australia

Sarens Australia can offer the following benefits to local mining companies:

- FEED studies knowhow and experience. With Sarens' engineers working closely with your project team during the FEED, pre-design and engineering execution phase of the project this will ensure the most optimal approach and safeguard the project targets.
- Strong in-house engineering department to verify the feasibility of selected Sarens technologies, configuration of SPMT, etc. to elaborate conceptual procedures, risk analyses, method statements and budgets for review from all relevant parties, to finalize procedures for works execution and hand over as built drawings to the highest standards.
- An experienced partner with six national operational yards from which equipment can be mobilized for maintenance contracts. Customers include Rio Tinto, Vale Inco, Xstrata, RCR, BMA, Anglo American and mining EPC contractors like Bechtel, SNC Lavalin, Technip, Hatch, Foster Wheeler and SKM.
- Youngest crane fleet in Australia equipped with black boxes to monitor fleet history and operational use. Maintenance services from out of 6 service centers by our fully equipped maintenance division.
- A dedicated well trained and disciplined team committed to achieve a high level of safety, quality service and environmental awareness.
- Sarens Australia is ISO9001:2008 and OHSAS18001:2007 certified. This indeed shows the industry our commitment to meet the requirements and demands of clients and our belief and willingness to work towards continuous improvement.

Contact Sarens today to see how we can support you on your next project. See www.sarens.com for details of the nearest Sarens Australia office/service center.

nothing too heavy, nothing too high

Stackers/reclaimers/shiploaders in Australia

No mining sites and coal terminals without stackers, reclaimers and Sarens! In the past years Sarens Australia has built up a strong reputation in load out/in, site moves, skidding, jacking, weighing, transport and installation of those stackers and reclaimers.

Customers: Port Kembla Coal Terminal (PKCT), ThyssenKrupp, Sandvik, FAM, Richards Bay Coal Terminal (RBCT), Iron Road, Rio Tinto, Xstrata, RCR, Hatch, ...

Contact Sarens today to see how we can support you on your next project. See www.sarens.com for details of the nearest Sarens Australia office/service center.

Following detailed expertise at client's advantages:

- Best in class engineering capability with on site transportation surveys and FEED studies
- Full service capability – offloads, transports, heavy rigging, assembly, relocations and dismantling
- Use of SPMT's to load in fully assembled machines, requiring low ground pressures (< 10ton/m²), positioning and alignment up to the mm, providing economic advantages and reducing schedule demands
- Well prepared for environmental obstacles – transporting over levees and unstable terrain
- Total range of operations – turnkey services to operate equipment rental with a large range of cranes, from 25 tons mobiles up to 3200 tons ringer crane for onsite installation
- Special equipments and solutions to ensure minimum interaction with the end clients existing operations (skids, jacks, towers, strand jacks, ...)
- Committed to quality, safety and operational excellence
