SARENS INSTALLS WORLD'S LARGEST FIXED SHIPLOADER AT CONVENT MARINE TERMINAL

SunCoke enlisted the experts at Sarens to plan and perform the challenging job of erecting the **massive shiploader** at CMT. Located on a jetty that is inaccessible to heavy machinery by land, Sarens developed a lift plan that included the use of a 300-ft x 100-ft barge to float **the largest and heaviest crawler crane used on a barge** for this type of operation, in North America.

To perform the challenging lifts, Sarens selected a Terex CC 6800 crawler crane from its fleet along with a **superlift wagon and ballast system**.
