

The image features a sunset background with two construction workers in silhouette on a lift. One worker is on the left, and another is on the right, wearing a hard hat and a high-visibility vest. A blue banner is overlaid on the top left, containing the company name and slogan.

SARENS

NOTHING TOO HEAVY, NOTHING TOO HIGH

OUR MISSION

At Sarens, we have the noble mission to be the reference in crane rental services, heavy lifting, and engineered transport for our clients. To do this, we deploy our **5 unwavering values:**

*Zeal
for
Excellence*

*Love
for
Tradition*

***Global**
Spirit*

*Brilliant
Solutions*

*Dedication
to
Safety*

SOLUTIONS WE PROVIDE

- CRANE RENTAL SERVICES
- HEAVY LIFTING & ENGINEERED TRANSPORT
- MECHANICAL MAINTENANCE
- TRADING

CRANE RENTAL SERVICES

EXTENSIVE FLEET OF CRANES
AND TRANSPORT TRAILERS

HYDRAULIC CRANES

LATTICE BOOM CRANES

TRANSPORT TRAILERS

CRANE RENTAL SERVICES

EXTENSIVE FLEET OF CRANES AND TRANSPORT TRAILERS

- Long term and short term rental
- With or without operator
- Quick and flexible availability
- Sarens takes care of maintenance, inspections and certificates

SOLUTIONS WE PROVIDE

- CRANE RENTAL SERVICES
- HEAVY LIFTING & ENGINEERED TRANSPORT
- MECHANICAL MAINTENANCE
- TRADING

HEAVY LIFTING & ENGINEERED TRANSPORT

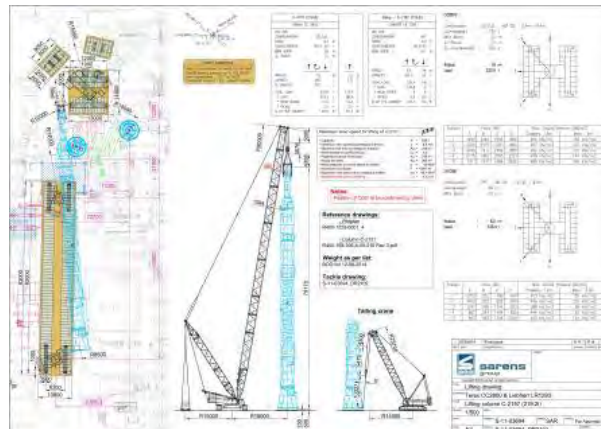

COMBINING HEAVY LIFTING
& SPECIAL TRANSPORT ACTIVITIES

HEAVY LIFTING & ENGINEERED TRANSPORT

CREATIVITY IN ENGINEERING

- Profound technical know-how
- Technical evaluation & preparation of projects
- Conceive, design & validate new equipment
- Software development

HEAVY LIFTING & ENGINEERED TRANSPORT

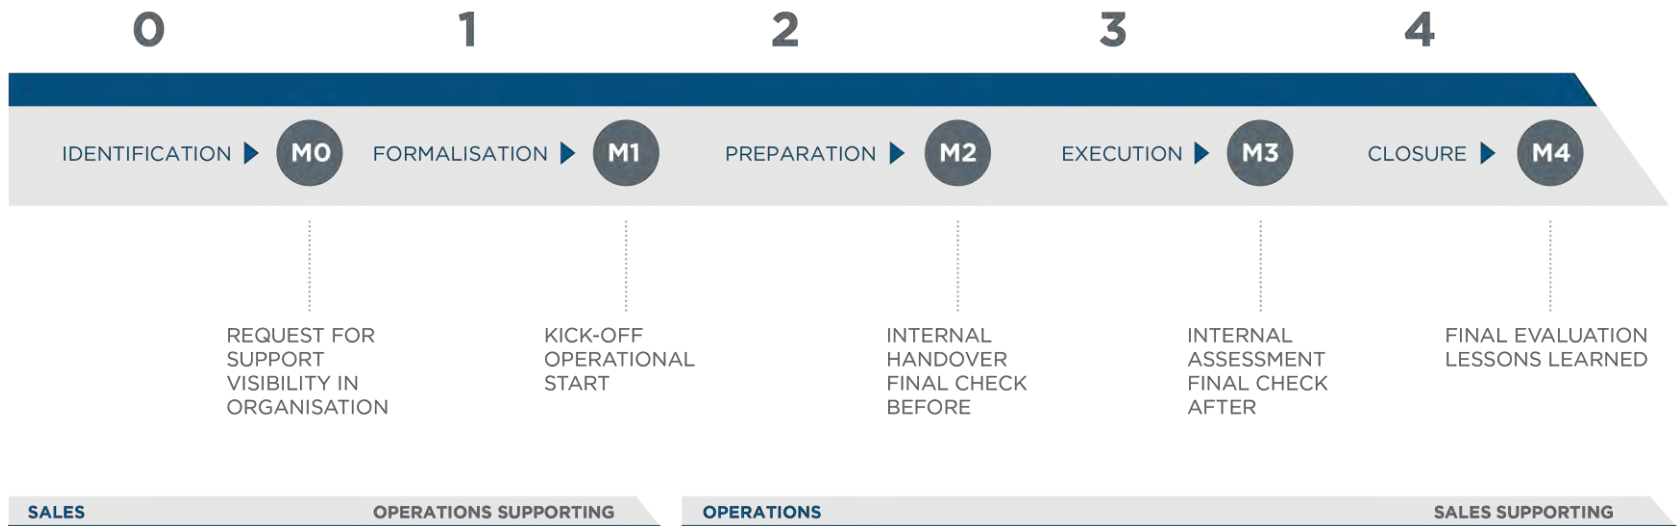

OPERATIONAL EXCELLENCE

- Optimum project management
- Compliance with clients' and Sarens Company Policy
- Efficient deployment as defined in Sarens Project Management
- Maximize efficiency: minimize time & costs
- Client feedback

STRAND JACKS

HYDRAULIC CRANES

- Able to drive on public roads
- Short mobilization and set-up time
- High level of mobility and versatility
- Capacity: from 5 up to 1200 tons

LATTICE BOOM CRANES

- Transported by truck and assembled on site
- Suitable for heavy loads
- Adjustable boom length
- Truck mounted, pedestal or crawler
- Capacity: from 50 up to 3200 tons

LATTICE BOOM CRANES

SARENS GIANT CRANE | SGC-120

- One of the largest cranes in the world
- In-house designed
- Lifting capacity up to 120.000 ton-meter
- Ring-based with limited footprint
- Containerized

HEAVY LUFFING TOWER CRANES

- Modular construction
- Free standing heights
- Very limited ground area
- Shipped by standard truck
- Capacity: from 150 up to 2400 ton-meter

CONVENTIONAL TRAILERS

Appropriate for road transportation
of loads up to 100 tons

CONVENTIONAL TRAILERS

- Solution for long-haul heavy road transport
- High loading capacity
- Modular design
- Pulled by prime-movers

SELF-PROPELLED MODULAR TRAILERS

- Designed for moving heavy loads
- Limitless configuration options
- Remote controlled steering
- Precision positioning
- Shipped on standard flat rack containers
- Capacity: from 34 up to 48 tons per axle line

“At times, the shuttle wings were over peoples’ lawns; literally an arm’s reach of this amazing piece of history.”

BARGES

- Lifting and transport operations on water
- Seagoing barges
- Twin barges
- Containerized modular barges to form different shapes

GANTRIES

- Alternative for crane lifting
- 5 different gantry types

GANTRIES

5 DIFFERENT TYPES

Consists out of push cylinders

HYDRAULIC GANTRY

Tower structure combined with strand jacks

SARENS MULTI LIFTING TOWER

Freestanding tower structure with climbing system

SARENS CLIMBING TOWERS

Multifunctional lifting system of hoist towers and hydraulic jacks

SARLIFT

Tower structure combined with a push hydraulic system

SARTOWER

JACKING

- Alternative lifting equipment for cranes when lack of space on assembly site
- Hydraulic cylinders combined with steel wires lift the heavy load
- Wide range of combinations possible
- Capacity ranging from 15 up to 1.130 tons

STRANDJACKS

- Alternative lifting equipment for cranes
- Elements added when cylinder is energized
- In-house designed
- Different jacking systems

SPECIAL EQUIPMENT

Horizontal moving system to push or pull a load

Modular wheeled frame with jacks for transport of heavy loads along train tracks

“Our highly qualified and problem-solving team members, make the difference.”

EMPLOYEES

WHO WELCOME ACCOUNTABILITY

- Highly skilled, well-trained & certified staff
- Unrivalled technical know-how
- Global learning & development portfolio
- Management Trainee Program

OUR KEY MARKETS

OIL & GAS

MINIMISING DOWNTIME IS KEY

The oil and gas sector is one of the core markets for Sarens. It involves the construction, refurbishment and maintenance of oil & gas plants and refineries, as well as the modularisation and assembly of heavier components. Site conditions often vary so when executing the lift of a 1.300 ton reactor, a 125 metre splitter column or the transport of a 15.000 ton topside module, we always provide efficient and tailor-made solutions. Our continuous efforts in the technical development of lifting and transportation equipment enable us to further minimise the downtime of a plant.

OUR KEY MARKETS

MINING

FULL-SCOPE PROJECT MANAGEMENT

Today's large-scale metallurgic refineries are built by assembling process and pipe rack modules, manufactured around the world at module yards. These modules are shipped by heavy cargo ships to the site location. Sarens provides module handling and load-in services on the manufacturing yard, load-out and inland transport services to often remote locations, heavy lifting and installation works on site.

OUR KEY MARKETS

CIVIL WORKS

RAPID MOBILISATION REDUCING ANY POSSIBLE DISRUPTION

Over the past decade, Sarens has been involved in many civil construction projects around the globe, providing transport and lifting activities for steel assembly work and the installation of complex roof instructions for soccer stadiums, event arenas and industrial buildings. Sarens also has a rich history in accelerated bridge replacement and installation, using a combined set of alternative rapid replacement technologies. A quick mobilisation is the main challenge to avoid disruption on your project. This is where Sarens stands out: flexibility and speed.

OUR KEY MARKETS

OFF SHORE & MODULE YARDS

Sarens has been a partner to the off shore and module yards industry for many years. Our activities cover the load-in, load-out and assembly of oversized and heavyweight modules, including general lifting services on off shore construction yards and for the FPSO (floating, production, storage and offloading) industry.

OUR KEY MARKETS

SOLAR

INCREASED HEIGHT, COUPLED
WITH REDUCED GROUND AREA

Although the solar industry is still in its developing stage, Sarens has already gained profound experience in the construction of solar towers. For the construction of these towers, Sarens uses its heavy luffing tower cranes which consist of a modular system and can reach up to considerable free standing heights with different jib lengths. As these types of cranes only require a small ground area, it makes them an ideal solution for solar projects.

OUR KEY MARKETS

ON SHORE & OFF SHORE WIND

LIFTING SERVICES, COMBINED WITH
ON SHORE AND OFF SHORE LOGISTICS

Sarens Off shore Wind participates strongly in the development and continuous growth of the renewable energy industry. Both on shore and off shore Sarens operates important equipment. Cranes are uninterruptedly working at sea, installing off shore wind farms on board of jack-up barges.

For the off shore wind industry, we complement our full-scope project management with providing on shore and off shore logistics such as the loading and unloading of extremely heavy wind turbine parts, logistics management and timely delivery of the different parts to the off shore site..

OUR KEY MARKETS

FORWARDING

With a vast array of global projects, Sarens has been the business partner of choice for land/marine forwarding since almost its very first steps as a Group.

OUR KEY MARKETS

GENERAL INDUSTRY

Our broad experience across all sectors makes us the ideal partner for heavy lifting and engineered transport in the general industry.

OUR KEY MARKETS

MAINTENANCE AND MONTAGE

A large volume of our business comes from the maintenance and montage industry. We serve all sectors on all continents with the varied capacities of our different cranes and special trailers.

OUR KEY MARKETS

THERMAL AND NUCLEAR POWER PLANTS

THERMAL POWER

MAXIMISING SAFETY WHILST MINIMISING PROJECT RISKS AND COSTS

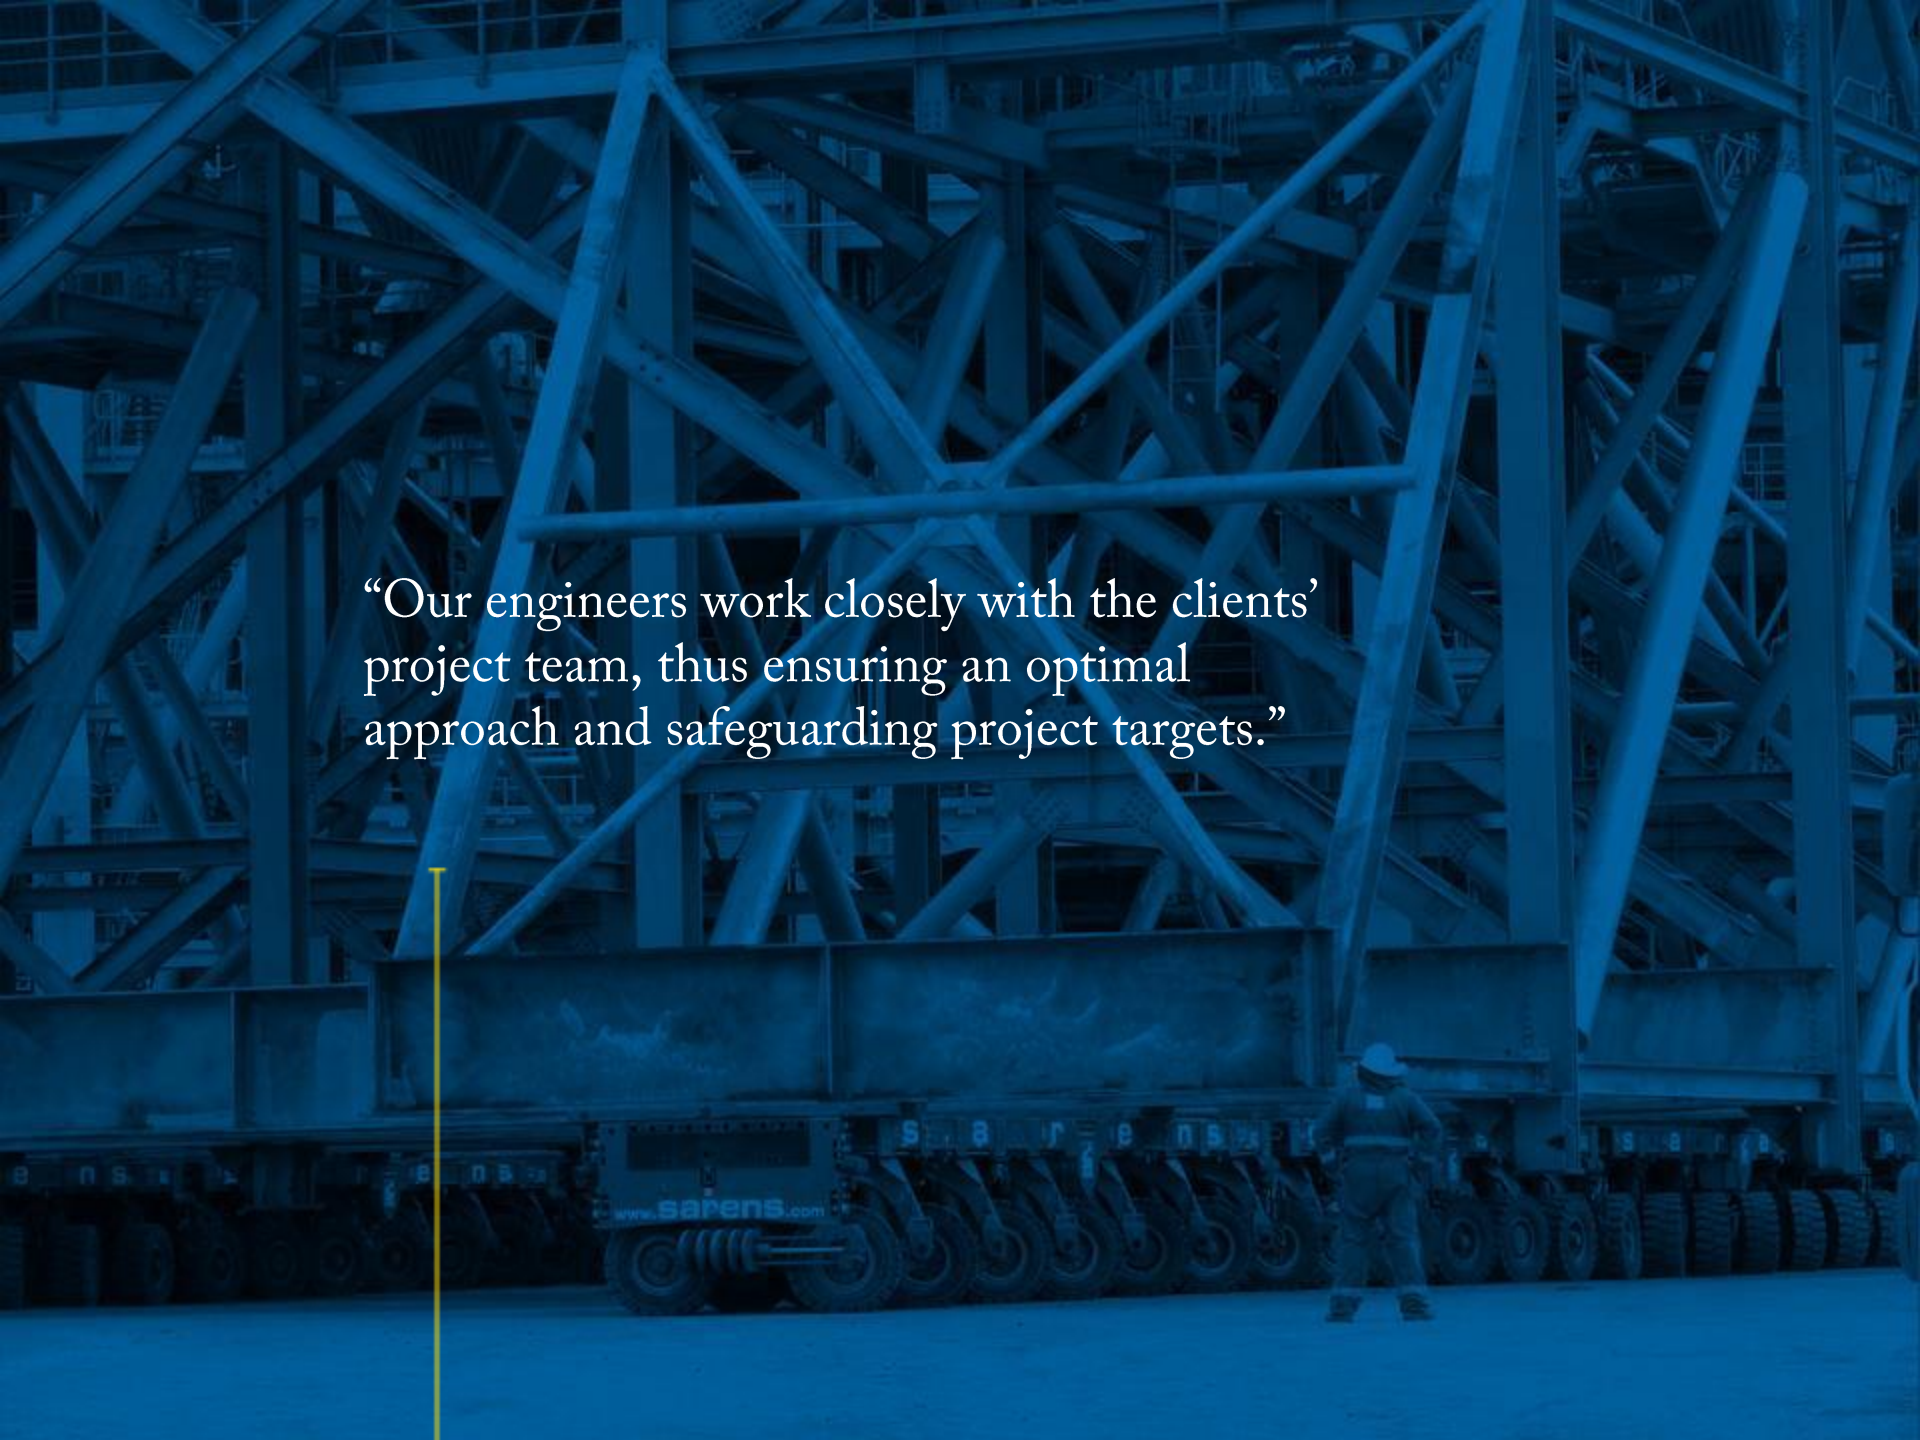

For many years, Sarens has been providing a total concept approach for gas- and coal-fired power plant projects, including heavy lifting, engineered transport and maintenance services. New lifting and transport techniques are constantly being introduced to enable the transportation, removal, assembly and installation of large and heavy components. Sarens is also experienced in the installation of rotating equipment such as turbines, generators and transformers.

NUCLEAR POWER

For nearly 40 years, Sarens has been a valued partner of nuclear power plant owners and operators around the world, supporting contractors and critical plant component manufacturers throughout plant life cycle activities. From new construction to major component replacements, plant upgrades through to facility decommissioning, Sarens has safely executed the most challenging of projects. With industry-leading engineering expertise, specialised rigging equipment and a highly skilled workforce, Sarens continues to offer the nuclear power sector creative and cost effective solutions, delivering high-quality results under demanding time and operational constraints.

“Detailed planning and optimum project coordination are key to minimize any possible down time.”

A blue-tinted photograph of a large industrial steel structure under construction. The structure is composed of a complex network of steel beams and girders. In the foreground, a multi-axle trailer is visible, with a worker standing next to it. The trailer has the website address "www.sarens.com" printed on its side. A vertical yellow line is positioned on the left side of the image, extending from the bottom towards the text.

“Our engineers work closely with the clients’ project team, thus ensuring an optimal approach and safeguarding project targets.”

“Our wide range of equipment can be adjusted to different site conditions and very restricted areas.”

sarsens

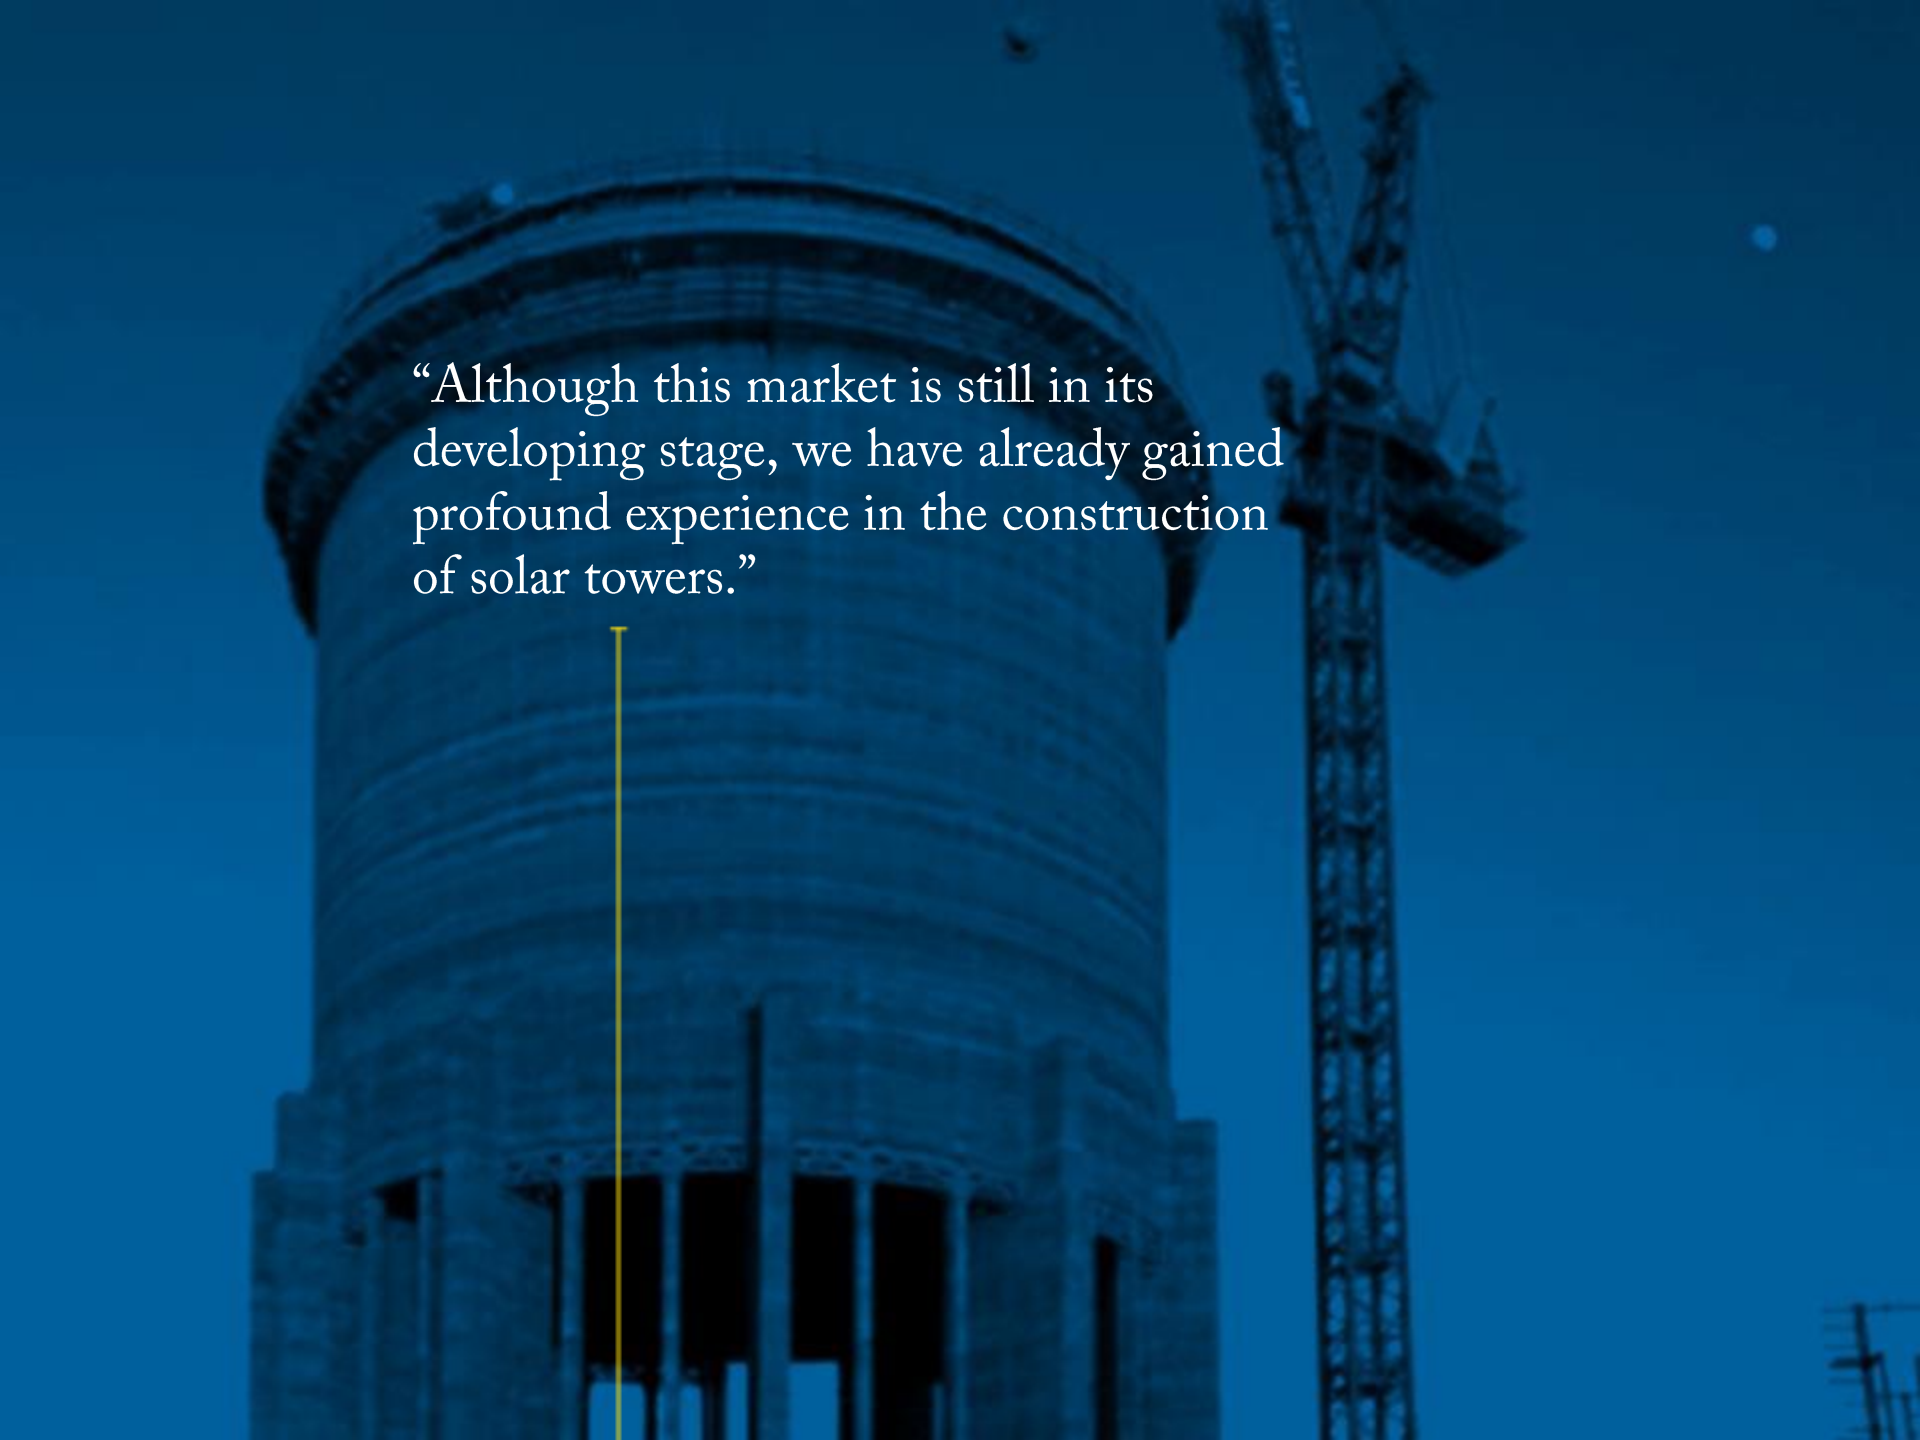

“While maximizing safety, we focus on minimizing project risks and costs. This makes us a reliable partner.

“Our global presence and broad experience enables us to provide clients with the most cost-effective solution.”

“We offer our offshore wind clients full scope project management: from engineering and transport over storage to lifting.”

“Although this market is still in its developing stage, we have already gained profound experience in the construction of solar towers.”

“As heavy lift partner for offshore projects for more than, 30 years, we offer the best technical solution in accordance with the highest offshore standards.”

“We moved our first bridge in the early ’80s. Today we execute an average of 70 bridge projects each year, using rapid replacement technologies and cranes.”

“We provide efficient and tailor-made solutions for all heavy lifting and special transport needs.

SPECIALIST OF THE EXTRAORDINARY
