

SARENS COAL POWER PLANT

• DISCOVER OUR SCOPE

- heavy lift and transport services in new build coal-fired plants
- from factory to foundation of equipment
- modularisation to speed-up lifting sequence
- assembly of heavier components
- installation of equipment (turbine, generator, trafo)

• KEY BENEFITS

- dedicated sales and project team
- assistance from Sarens Engineering team
- optimising crane solutions and on-site transport
- new lifting and transport techniques
- cost and time savings during installation
- tailor-made “total concept” with diversity of equipment
- reduction of interfaces to optimise safety and efficiency
- one-hand coordination
- management of lay-down area
