Sarens Jacks and Installs 950T Bridge in Netherlands

Sarens recently celebrated the success of a jacking and installation operation for the Zwolle Bridge in the Netherlands. The 950T, 108m long bridge, which is being built by ProRail, will cross over the train tracks at the Zwolle train station and serve about 1.200 buses per day.

New Sarens Depot Opening Soon in Paris

Sarens is proud to highlight new depot openings around the world, including a new facility near Paris. This new depot is located in Pierrelaye, a village just outside of Paris in the Île-de-France region. The new facility will serve as a crane depot and offer a host of sales, operations, maintenance, and planning services.
