Sarens Creators & Explorers Series - What does Sarens look for in a crane purchase?

Spanning the globe and soaring to the skies, Sarens' fleet of over 1.500 cranes are deployed on some of the greatest heavy lifting and engineered transport projects of today. From nuclear sites in the most remote regions of the world to soaring cathedrals in vibrant city centers, Sarens' cranes are the strength behind major projects across the globe, always living up to the motto of "Nothing too heavy, nothing too high."
