

SARENS K24 SPMT

CONFIDENCE IN EVERY MOVE

- **DISCOVER OUR SARENS K24 SPMT**

Why Choose the SCHEUERLE K24ST with Sarens?

Because your projects demand the best in **safety, efficiency,** and **uninterrupted performance** — and that's exactly what we deliver: Confidence in every move.

- **UNMATCHED SAFETY THROUGH FULL SYSTEM REDUNDANCY**

- Redundant Setup

Failing components won't cause a complete standstill. Issues in one trailer can be isolated from the complete configuration, keeping the equipment operational.

- 1.Hose Burst Protection

Built-in burst valves in all lifting hoses to eliminate the risk of sudden pressure loss.

- 2.Hose Redundancy Between Trailers

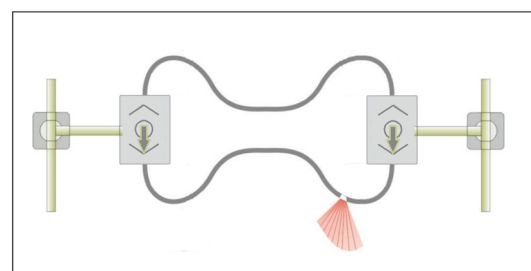

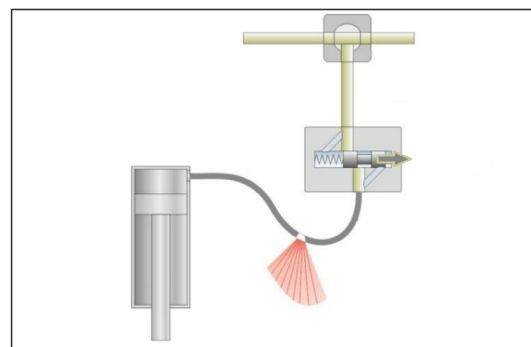

Maintains lifting operation even during inter-trailer connection failure.

- Pressure monitoring in every trailer

All pressure is trailer-monitored for localised safety and control.

- **WHAT THIS MEANS FOR YOU: ✓**

No unexpected stops. No risk to your load. Maximum protection for your assets and team.

SARENS K24 SPMTs

- **ENGINEERED FOR MAXIMUM UPTIME AND PERFORMANCE**

- **Leak-Free Hydraulic Connectors**
Clean, long-life performance.
- **Standardised Electrical Components**
Fast, easy repairs with globally available parts.
- **Compatibility with Other Scheuerle SPMTs**
Mix and match with existing fleet with the help of a C-Box communication kit.

- **WHAT THIS MEANS FOR YOU: ✓**

No delays. Simplified servicing. Reduced total cost.

- **SMARTER LIFTING WITH ADVANCED TECH**

- **Lifting Block in Every Trailer**
Allows grouped or independent lifting.
- **Pressure Monitoring at Trailer Level**
Precision control across every axle.
- **Ethernet/Profinet Communication**
Real-time feedback, faster reactions, safer handling.

- **WHAT THIS MEANS FOR YOU: ✓**

Precise positioning. Safe lifts. Confidence in every move.

- **SUSTAINABLE POWER OPTIONS**

- **Power Unit Options:**
Tier 3 (CAT), Stage 4/Tier 4 Final (MTU/Deutz),
Stage 5/Tier 4 Final (MTU/Deutz)
- **Electric Power Pack Unit (E-PPU)**
for wzero-emission operations in low-emission zones.
- **HVO Diesel Compatible**
Ready for renewable, sustainable fuel.
- **Solid Filled Tires (No 15 Bar Air)**
No blowouts. No surprises.

- **WHAT THIS MEANS FOR YOU: ✓**

Future-proof your operations. Reduce carbon footprint. Improve onsite reliability.

When safety is non-negotiable, Sarens delivers the only SPMTs with *true full redundancy* in suspension systems.

KEY ADVANTAGES:

- Confidence in every move
- Uncompromised safety
- Seamless operations
- Cost efficiency
- Sustainable performance
- Global compatibility
- Proven reliability
