

# SARENS CLIMBING SYSTEM CS350

## • DISCOVER OUR CS350

- In-house design
- Method for lifting heavy loads
- Lifting capacity of 350T per tower

## • ADVANTAGES

- Fully containerised
- Limited footprint
- Jacking stroke of 450mm
- Low starting height
- High level of control from central computer
- 100% ground controlled safe jacking
- Safety performance level C
- Automatic feeding system
- Multiple tower set-ups

## CLIMBING SYSTEM CS350

### • WORKING PRINCIPLE

- Self-climbing lifting tower built while jacking
- Jacking with elements of 300mm
- Lifting by means of four jacks per tower
- Jacks are composed of hydraulic cylinders combined with hydraulic locking system

### • SOLUTIONS

- Pre-jacking before transport or installation
- Custom-made
