Sarens Works at the Green Energy Project in France

The Green Energy project at Swiss Krono aims to transform the Sully Sur Loire site and replace around 90 percent gas consumption with renewable biomass sources. In a short rental project, Sarens was commissioned to lift the PCBR2 Smokestack. The challenge was to work under live plant conditions within a tight space and minimal disruption to nearby structures.

Sarens Sets Industry Record Replacing Two Heaters at U.S. Nuclear Station

Sarens is steadily expanding its presence across North America, and are proud of recent projects completed across the continent—including the recent lifting of two heaters at Duke Energy's Oconee Nuclear Station in South Carolina, USA. This pivotal project involved replacing two feedwater heaters, with both the old and new heaters weighing 130,000 pounds.
