

HEAVYWEIGHT NEWS

Sarens Saves Christmas!

On the night before Christmas, a great disgrace has fallen upon Mother Christmas's reindeer. Dasher, Dancer, Prancer, Vixen, Comet, Cupid, Donner, Blitzen, and Rudolph have fallen ill! Mother Christmas is wondering what to do.

Find out how Sarens helped Mother Christmas deliver the gifts to the children, on time for Christmas.

Happy Holidays!

CARBON REDUCTION

Sarens Wins the BLCC Golden Bridge Award for "Carbon Reduction"

The Golden Bridge Awards are presented annually to the most successful Belgian and Luxembourg companies exporting to or trading in the UK. Sarens, the global leader in crane rental services and heavy lifting, has been awarded the Golden Bridge Award for Carbon Reduction 2023. Sarens received the award for our commitment to sustainable practices and innovative solutions. Sarens always stands at the forefront of the renewable energy sector, providing intelligent solutions to heavy lifting challenges.

Sarens Moves Historic WWI Monument in Precise and Painstaking Operation in Toulouse, France

Toulouse is home to significant monuments and statues, among them the Monument of the Combatants of Haute-Garonne, a large memorial commemorating all those who fought in the two world wars. But with the construction of a new metro station below, Sarens' client, Bouygues Travaux Publics, needed to carefully move the historic monument to a new temporary location until the metro's completion in 2028. So, Sarens was called in to conduct an extremely precise, slow, and methodical pickup and transport operation via SPMTs.

How Sarens, Allseas & Aker BP Turned a 6.800T Challenge Into a Triumph

Early in 2022, Sarens equipment stood at the ready, awaiting a massive topside that would be loaded in at the Aker Solutions decommissioning yard in Stord, Norway. But when the topside turned out to be heavier than expected, Sarens and clients Allseas and Aker BP had to think fast and work together to make the load-in a success.

Sarens Technical Solutions Behind Expert Bridge Installation in Nantes, France

Sarens Technical Solutions & Engineering is known for taking on any client challenge and delivering masterful results—especially with bridge installations, which are often complex yet time-sensitive operations. Such was the case at one of Sarens' most recent bridge installation projects, and owned by customer Bouygues Travaux Publics Régions France and owner VINCI Autoroutes, along the A11 highway in Nantes, France. The Sarens team came together in June of 2023 to successfully jack, transport, and install a 740-tonne, 110-metre long bridge along the A11 at the Portes de Gesvres interchange.
