

HEAVYWEIGHT NEWS

Celebrating 20 years of Heavyweight News!

Back in 2003, Sarens embarked on a mission.

We committed to share news of our work with all of you globally.

Work that changes people's lives.

Work that improves cities.

Work that solves big industry challenges.

Work that defines our present and our future.

Work that keeps people around the world safe.

Work that matters.

Projects that matter. Big or small.

Today, we celebrate an iconic newsletter. An industry pioneer.

We celebrate 20 years of Heavyweight News.

A newsletter with a mission. A mission to inspire the heavy lifting industry.

Join us in celebrating and thank you all for your loyal readership!

Sarens Gets the Party Started at Tomorrowland, Ghent Jazz, and Rock Werchter

Tomorrowland, Ghent Jazz, and Rock Werchter: they are three of the biggest music festivals of the summer, and they all depend on Sarens to set the stage for weeks of entertainment. To make sure they started on all the right notes, Sarens cranes reported for duty to help set everything up before festivities kicked off.

Sarens Loads in First of 176 Monopiles for Monumental U.S. Offshore Wind Project

Sarens Projects in the USA is excited to support our client, Virginia International Terminals (VIT), with operations at the Portsmouth Marine Terminal (PMT), the hub for offshore wind projects including the momentous Coastal Virginia Offshore Wind (CVOW) farm. There are currently only twelve wind turbine generators off the Eastern U.S. coast, and CVOW promises to be the largest project of its kind in the United States. Our presence on this important project reflects Sarens' long-term commitment to the future of offshore wind projects in the U.S. and across the globe.

Sarens Executes Seamless Transport and Installation Operation for Horizon Oil Sands Project in Canada

When clients need full-service solutions for complex transportation and lifting challenges, they turn to Sarens. Applying our world-class engineering expertise and equipment to real-world challenges is a Sarens hallmark, and we recently had the opportunity to do just that as we engineered the assembly, transport, and installation of three major unit (VDU) components for the Horizon Oil Sands Project in Fort McKay, Canada.
