Sarens Powers The Transport of Tunnel Boring Machines for Poland's Longest Railway Tunnel

Sarens in Poland was at the heart of an ambitious infrastructure project that will reshape railway connectivity in Southern Poland. As part of the Budowa LK104 project, Sarens was entrusted with the complex transportation of two Tunnel Boring Machines (TBMs) from the Port of Gdynia/Gdańsk to Limanowa, contributing to the construction of Poland's longest railway tunnel.

Sarens Completes Record-Breaking Decommissioning Lift in Norway

Sarens has successfully completed a landmark decommissioning project at the Wergeland Base in Gulen, Norway, involving the lifting, transport, and re-immersion of four massive footings. The standout feature of the project was the use of Sarens' LR12500-1.0 crawler crane to lift each footing, weighing an extraordinary 1850 tonnes. Lifting such a weight with a single crawler crane is an exceptionally rare feat in Europe and may well be a record-breaking achievement.

Sarens Proudly Installs Proton Therapy Equipment at Children's Cancer Hospital in Cairo

Sarens believes that our work has a measurable impact on the world, and whether we're improving water quality in London by building better sewage infrastructure or installing nuclear facilities for greener energy options, we're proud to be a part of life-changing projects worldwide. Our latest project for the Children's Cancer Hospital in Cairo, Egypt, is another example of how Sarens' expertise is supporting those who make our world a better place.
