Pioneering Progress Beneath Paris: How Sarens Moves the Impossible

Sarens was entrusted with the complex task of transporting a tunnel boring machine (TBM) for the Grand Paris Express, one of Europe's most ambitious infrastructure projects. The operation involved moving a 1.500-tonne, 100-metre-long TBM across a 700-metre distance, from its assembly platform to the starting point of tunnel excavation for Line 17 of the Grand Paris Express.
